Web Browser Crack With License Key PC/Windows

Web Browser is an extremely simple utility you can use to quickly connect to the World Wide Web. It is just like a web browser, but it lacks all of the bells and whistles you would expect from such an application. It is easy to use, contains basic features to navigate and view web pages, yet it is also stripped down so that it consumes minimal resources on your PC. General functionality: The Web Browser is a basic browser without any advanced features. It displays the currently selected web page in a preview window, which is resizable, but not scrollable. The default view is just one page at a time, so you need to click Go back and go Go forward buttons in order to browse web pages. To get to Google search results, click the Google link in upper right. You can either search the entire Internet by typing a search string or by selecting a site from a list of bookmarks. You can either open or download the currently selected web page. You can view files for download, view list of files currently available on your PC, or view the progress of a file transfer in progress. You can either move to the next web page or move back to the previous page. You can delete a web page. You can visit a host of web sites listed in a bookmark. You can clear all web page information by selecting the reset button. You can search for a particular web page and then link to it. The application has no options to alter page display, zoom in and out, bookmark pages, etc. Personalization: The Web Browser does not allow you to customize its default settings. The application does not use any sounds. To customize and view all settings, go to Tools/Options. You can keep the default view permanently on a single web page or switch it to "All". You can use "Home", "Back" and "Forward" buttons to move to the previous, next or specific pages. You can save the current web page in a folder. You can preview all downloaded files. You can use "Web Slices". You can easily delete all bookmarks. You can delete all opened windows. You can check the option that tracks the pages you visit. You can view a log of your web-browsing activities. You can sync your bookmarks across PCs.
